SKILLS

Infrastructure & Cloud

Linux Windows Server

Active Directory / GPO

Microsoft 365 Docker

Proxmox / VMware AWS

Cloudflare Nginx

Network & Security

VLAN / QoS DNS / DHCP

Firewalls Hardening DR / BCP

Veeam / Synology NAS

Incident response GLPI Wazuh

PRTG

Automation & Integration

n8n Ansible Bash / Python

REST API Webhooks

Methods

ITIL (practical) Agile / Scrum

Project management

STRENGTHS

Team management and coaching

Autonomy and focus on results

Client communication, plain language

Mbolafinaritra
ANDRIANARIMANANA

IT Manager · Systems & Networks · Automation & Integration

IT manager with a systems and network administration background and 9 years in production IT. At Ingedata, I led a team of five and a 50+ server Linux and Windows estate across operations, Active Directory, networking, security, continuity and suppliers. My differentiator is automating operations and connecting tools through APIs, webhooks and monitored workflows.

9+

years in IT

50+

servers monitored

EXPERIENCE

Infrastructure & Service Continuity Consultant · since June 2026

Independent

- Infrastructure and continuity engagements: virtualisation, backups, recovery, operational security and automation with Ansible, n8n, Docker, APIs and webhooks.

Head of IT & Facilities · Ingedata Dec 2024 – May 2026

- Accountable for IT performance, security and continuity: Linux / Windows, AD/GPO, virtualisation, networks, monitoring, recovery, Veeam backups to Synology NAS.
- Direct manager of 5: monthly review of difficulties, solutions chosen and deployed together, lessons added to the GLPI knowledge base. Scope: helpdesk, IT and furniture assets, electrical, network and building maintenance.
- Migrated the production servers from VMware to Proxmox, prepared and carried out with no interruption to the business.
- Hardening and automation with Ansible and Docker (reproducible provisioning and updates across the estate); application support on the business systems, including the SAGE ERP.

Senior IT Technician · Webhelp / Concentrix Jan 2021 – Oct 2024

- Ran the Active Directory domain and its GPOs, the DNS / DHCP services and the Office 365 tenant: accounts, permissions, licences and policies applied across the estate.
- Technical projects and tooling rollout across the estate, inter-site links, security, application support including the SAGE ERP. Windows Server, Cisco / Meraki, PRTG.

IT Apprentice · BNI Madagascar 2017 – 2020

- Cross-team support for an IT department split into silos (development, network, systems): three years stepping in wherever it was urgent.

SELECTED PROJECTS

VMware to Proxmox migrations on production estates — Proxmox · VMware · Backup

Inventory first, backups verified by a real restore, switchover in batches with a way back at each batch. No business interruption observed.

Automated helpdesk management reporting from GLPI — GLPI · n8n · ITIL

Monthly helpdesk steering: ITIL SLAs per technician from GLPI exports, executive report drafted by AI, detection of team overload and recurring incidents.

Sentinel SRE — predictive monitoring with AI — n8n · Gemini · Bash

Proactive monitoring of 50+ Linux servers, AI analysis of the vital signs, consolidated alerting.

Delivery of a school information system into production — API · Access · Docker

Online enrolment, LMS, marks, attendance, re-enrolment by QR code. 35+ Doctrine entities, JWT RSA, Docker, running in production.
